

SKYMAX FLEETWOOD RETRACTABLE ROOF SYSTEM

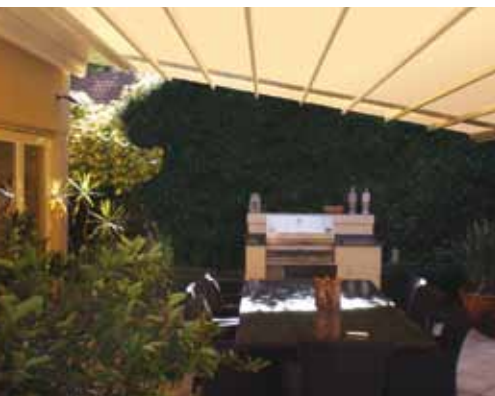

Extend your living area with The SkyMax Fleetwood System. An intelligent all-in one solution that protects you from the elements, while delivering functionality with style. Utilising the latest technology, the system is manufactured to the highest quality. With a rich timber element for innovation & style, the Fleetwood surpasses all other shade systems in the market.

Protection – Delivering optimum protection against sun and rain, The SkyMax Fleetwood System has been designed and engineered to withstand wind speeds of up to 90km/hr. With a maximum width of 15 metres, and projection of 6 metres, the system allows protection up to 100 square metres.

Functionality – The SkyMax Fleetwood System will not confine your area or add additional heat during the warmer months of the year, unlike conventional roofing or louvered systems. The SkyMax Fleetwood is easily extended or retracted with the remote control, allowing you to stop the awning at your desired position.

Technology – We pride ourselves on utilising the latest technology from Europe & Australia, enabling us to bring the most modern & stylish systems available to the market.

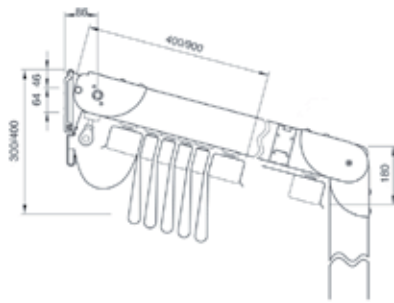

Quality – The SkyMax Fleetwood System is European in design & manufactured in Australia by our highly skilled team. Quality is always one of our highest priorities, ensuring total customer satisfaction in everything we do.
